

Frontend engineer with **4+ years** building production **React, React Native, and TypeScript** applications across web and mobile. Most recently shipped credit card onboarding, identity verification, and KYC flows at **Gemini**, used by ~587K monthly transacting users. Experience spans design systems, component libraries, accessibility (WCAG 2.1 AA), performance optimization, A/B testing, and CI/CD pipelines. Full-stack capable with Node.js, REST/OpenAPI services, and SQL/NoSQL databases.

EXPERIENCE

Gemini · Frontend Software Engineer (Web & Mobile)

Dec 2024 – Feb 2026 · San Francisco, CA

Cryptocurrency exchange and financial platform serving retail and institutional clients across trading, credit card, and digital asset products.

- Owned the credit card application funnel across React (web) and React Native (Expo). Built pre-qualification, identity verification (Onfido KYC), approval, activation, referrals, and rewards selection. Used by ~587K monthly transacting users during 17% YoY platform growth.
- Built multi-step onboarding workflows in TypeScript with REST/OpenAPI integrations, eligibility gating, defensive error handling, and feature flags. Shipped two consumer credit card launches and the Predictions market application.
- Built the team's experimentation infrastructure: Mixpanel funnel instrumentation, A/B test scaffolding, and referral entry points. Supported 12+ production experiments measuring conversion and engagement.
- Cut CI runtime ~25% with Jest unit tests, React Testing Library, Playwright E2E and smoke tests, and parallelized test pipelines. Reduced PR-to-deploy time and on-call regressions.
- Increased team velocity ~20–25% by adopting AI-assisted workflows (Claude Code, MCP tooling) and led the migration from Jira to Linear. Onboarded peers and authored internal documentation.
- Mentored junior engineers and interns through pairing, code review, and design review across web and mobile. Implemented Figma designs as accessible (WCAG 2.1 AA, ARIA), responsive interfaces using a shared design system and component library.

Upstart · Software Engineer

May 2021 – Mar 2023 · San Mateo, CA

AI lending platform partnering with banks and credit unions to provide consumer loans using non-traditional variables.

- Led the customizable-loan initiative end-to-end with product and design. Drove an **8% increase in customer conversion** within 3 months of launch.
- Migrated high-traffic product surfaces to Next.js SSR. Reduced load time by **40%** and raised Lighthouse performance scores above **90** across the loan funnel.
- Built and maintained a React + TypeScript component library used in applications serving **3M+ customers**, integrated with Ruby on Rails backend services.
- Drove reliability with **90%+ test coverage** (Jest, RSpec, Playwright, React Testing Library) and full **WCAG 2.1 AA** accessibility compliance across regulated financial workflows.
- Held production incident rate below **8%** through proactive monitoring with Datadog, SumoLogic, and Bugsnag, plus disciplined triage during on-call rotations.

Tonight · Software Engineer

Jul 2020 – Feb 2021 · San Francisco, CA

Mobile and web app surfacing local nightlife venues and events.

- Led a 3-person frontend team. Ran daily standups, established React conventions, and shaped UI/UX direction for the application.
- Built the React web client and Swift / React Native mobile experiences for nightlife venue and event discovery.
- Designed RESTful Node.js and Express APIs backed by MongoDB, powering the data layer between the database and frontend.

SKILLS

Frontend	React · React Native · React Hooks · Expo · Next.js (App Router, Server Components, SSR, SSG, ISR) · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · Sass · Tailwind CSS · Styled Components · Framer Motion · Redux · Redux Toolkit · React Query · React Hook Form
Architecture	Design Systems · Component Libraries · Storybook · Accessibility (WCAG 2.1 AA, ARIA, Semantic HTML) · Performance Optimization · Core Web Vitals · Bundle Analysis · Code Splitting · Lazy Loading · Responsive Design · Mobile-First · Cross-Browser Compatibility · A/B Testing · Feature Flags · Internationalization (i18n)
Testing	Jest · React Testing Library · Playwright (E2E + smoke) · RSpec · Test-Driven Development (TDD) · Unit / Integration / End-to-End Testing
Backend & APIs	Node.js · Express · REST APIs · OpenAPI · GraphQL · Ruby on Rails · Python · Django · PostgreSQL · MongoDB · SQL · NoSQL · WebSockets · Webhooks
Tools & Platforms	AWS · Vercel · Docker · Git · GitHub · GitHub Actions (CI/CD) · Webpack · Vite · npm · yarn · Datadog · Sentry · Mixpanel · SumoLogic · Linear · Jira · Confluence · Figma · Slack · Agile · Scrum · Kanban · Claude Code · MCP

EDUCATION

App Academy · Full-stack software development bootcamp (Oct 2019 – Mar 2020) · University of California, Irvine · B.S. Biology (Sep 2013 – Jun 2017)
