

Frontend engineer with **4+ years** specializing in **React and React Native**, building scalable fintech onboarding and activation systems across web and mobile platforms. Experienced in delivering high-impact product features, optimizing user funnels, and collaborating across the stack with backend services and APIs. Strong across design systems, component libraries, accessibility (WCAG 2.1 AA), performance optimization, A/B testing, and CI/CD.

EXPERIENCE

Gemini · Frontend Software Engineer (Web & Mobile)

Dec 2024 – Feb 2026 · San Francisco, CA

Cryptocurrency exchange and financial platform serving retail and institutional clients across trading, credit card, and digital asset products.

- Core frontend engineer on Gemini's consumer credit card platform, shipping **146 PRs** across React web and React Native (Expo) mobile applications, contributing **~30K lines of TypeScript/JavaScript** across 1,095 files supporting onboarding, approval, activation, rewards, and card management.
- Built and optimized the credit card onboarding and application funnel used during peak **~587K monthly transacting users** and **17% YoY platform growth**, delivering pre-qualification, identity verification, approval flows, referrals, rewards selection, and post-approval activation.
- Developed multi-step financial onboarding workflows using React, React Native (Expo), TypeScript, and REST/OpenAPI APIs, enabling launches of retail and business credit card products and the Predictions market application across web and mobile platforms.
- Implemented growth and experimentation features including referral systems, promotional entry points, A/B testing, and Mixpanel analytics instrumentation to measure conversion, user engagement, and funnel drop-off.
- Built resilient fintech onboarding systems integrating Onfido identity verification (KYC), regulatory compliance requirements, eligibility gating, and defensive error handling across regulated financial workflows.
- Improved engineering reliability and delivery speed through unit testing (Jest, React Testing Library) and Playwright E2E + smoke tests, optimizing CI/CD pipelines to reduce build runtime **~25%** and increase development velocity **~20–25%** via AI-assisted workflows (Claude Code, MCP tooling) and migration from Jira to Linear.
- Improved frontend performance through bundle analysis, code splitting, dynamic imports, and image optimization, contributing to faster Time-to-Interactive on critical onboarding and application surfaces.
- Authored design documents and contributed to architecture reviews for credit card and onboarding initiatives, partnering with senior engineers and product to align on scope, component boundaries, and rollout strategy.
- Mentored junior engineers and interns through pair programming, code review, and design review, while implementing accessible (WCAG 2.1 AA, ARIA) responsive interfaces from Figma against a shared design system and component library.

Upstart · Software Engineer

May 2021 – Mar 2023 · San Mateo, CA

AI lending platform partnering with banks and credit unions to provide consumer loans using non-traditional variables.

- Led engineering initiative enabling customizable loan features, resulting in an **8% increase in customer conversion** within 3 months of launch.
- Migrated high-traffic product pages to Next.js server-side rendering, reducing load times by **40%** and improving Google Lighthouse performance scores to **90%+** across key application flows.
- Built scalable React and TypeScript components powering applications used by **3M+ users**, integrated with Ruby on Rails backend services and OpenAPI-driven REST APIs.
- Strengthened reliability and quality by achieving **90%+ automated test coverage** (Jest, React Testing Library, RSpec, Playwright) and ensuring full **WCAG 2.1 AA** accessibility compliance across interactive financial workflows.
- Maintained production health by holding incident rate below **8%** through proactive monitoring (Datadog, SumoLogic, Bugsnag) and disciplined triage during on-call rotations, while supporting newer engineers through pair programming and code review.

Tonight · Software Engineer

Jul 2020 – Feb 2021 · San Francisco, CA

Mobile and web app surfacing local nightlife venues and events.

- Led the front-end development team of **3 engineers**, conducting daily stand-ups, establishing React conventions, and shaping UI/UX strategy for the application.
- Developed and optimized front-end modules for the web (React) and mobile platforms (Swift, React Native), focused on delivering a clean and intuitive user experience for nightlife venue and event discovery.
- Designed and implemented RESTful API endpoints using Node.js and Express.js, facilitating seamless data exchange between the MongoDB database and front-end modules.

SKILLS

Frontend	JavaScript (ES6+) · TypeScript · React · React Native · Expo · Next.js (App Router, Server Components, SSR, SSG, ISR) · Redux Toolkit · React Query · React Hook Form · HTML5 · CSS3 · Tailwind CSS · Styled Components · Framer Motion · Storybook · Design Systems · Component Libraries · Accessibility (WCAG 2.1 AA, ARIA, Semantic HTML) · Responsive Design · Performance Optimization · Core Web Vitals · Code Splitting · A/B Testing · Feature Flags · Internationalization (i18n)
Backend & API	Node.js · Express.js · Ruby on Rails · Python · Django · REST APIs · OpenAPI · GraphQL · PostgreSQL · MongoDB · SQL · NoSQL · WebSockets · Webhooks
Testing	Jest · React Testing Library · Playwright (E2E/Smoke) · RSpec · Test-Driven Development (TDD) · Unit / Integration / End-to-End Testing
Tools & Platforms	AWS · Kubernetes · Docker · Vercel · GitHub Actions (CI/CD) · Git/GitHub · Webpack · Vite · npm · yarn · Mixpanel · Datadog · Sentry · SumoLogic · Bugsnag · Linear · Jira · Confluence · Figma · Slack · Agile · Scrum · Kanban · Claude Code · MCP

EDUCATION

App Academy · Immersive Full-Stack Software Engineering	San Francisco, CA · Oct 2019 – Mar 2020
University of California, Irvine · B.S. Biology	Irvine, CA · Sep 2013 – Jun 2017
