

Frontend engineer with **4+ years** specializing in **React, React Native, and TypeScript**, building scalable fintech onboarding and activation systems across web and mobile. Comfortable owning feature delivery end-to-end, from Figma to feature-flagged rollout, across regulated financial workflows. Track record optimizing user funnels, reducing CI and release friction, and shipping accessible (WCAG 2.1 AA) interfaces against shared design systems. Cross-functional partner to product, design, and backend engineering.

EXPERIENCE

Gemini · Frontend Software Engineer (Web & Mobile)

Dec 2024 – Feb 2026 · San Francisco, CA

Pre-IPO cryptocurrency exchange and fintech platform serving retail and institutional clients across trading, credit card, and digital asset products.

- Core frontend engineer on Gemini's consumer credit card platform across React (web) and React Native (Expo). Authored **146 PRs** totaling **~30K lines** of TypeScript and JavaScript across **1,095 files**, spanning onboarding, identity verification, approval, activation, rewards selection, and card management surfaces.
- Built and optimized the multi-step credit card application funnel (pre-qualification, identity verification, approval, activation, rewards selection) supporting **~587K monthly transacting users** during a **17% YoY** platform growth period.
- Developed cross-platform onboarding workflows in React, React Native (Expo), and TypeScript over OpenAPI-driven REST services, enabling launches of retail and business credit card products and the Predictions market application.
- Implemented referral, promotional, and experimentation surfaces instrumented with Mixpanel to track funnel conversion, drop-off, and engagement across A/B test cohorts via a typed event-tracking wrapper.
- Integrated Onfido identity verification (KYC) with eligibility gating, retry logic, and defensive error handling across regulated financial workflows, supporting state-by-state compliance requirements.
- Reduced CI/CD build runtime **~25%** via test pipeline parallelization and selective Jest and React Testing Library coverage. Expanded Playwright E2E and smoke audits to harden release confidence.
- Drove **~20–25%** team velocity gains by adopting AI-assisted development workflows (Claude Code, MCP tooling). Led the team's migration from Jira to Linear, including peer onboarding and process documentation.
- Improved Time-to-Interactive on critical onboarding surfaces through bundle analysis (@next/bundle-analyzer), code splitting via dynamic imports, and next/image-driven asset optimization.
- Authored design documents and participated in weekly architecture reviews for credit card and onboarding initiatives, aligning component boundaries, API contracts, and feature-flagged rollout strategy with senior engineers and product partners.
- Mentored junior engineers and interns through pair programming, code review, and design review, while shipping accessible (**WCAG 2.1 AA**, ARIA, semantic HTML) responsive interfaces from Figma against the team's shared design system.

Upstart · Software Engineer

May 2021 – Mar 2023 · San Mateo, CA

AI lending platform partnering with banks and credit unions to provide consumer loans using non-traditional underwriting variables.

- Led engineering on the customizable-loan-features initiative end-to-end with product and design, driving an **8% lift in customer conversion** within 3 months of launch (measured via in-production A/B test against control).
- Migrated high-traffic loan-application surfaces from CSR to Next.js server-side rendering, reducing load times by **~40%** and lifting Google Lighthouse performance scores **above 90** across key application flows.
- Built React and TypeScript component primitives shared across loan-application surfaces serving **3M+ customers**, integrated with Ruby on Rails services over OpenAPI-driven REST.
- Maintained **90%+ automated test coverage** (Jest, React Testing Library, RSpec, Playwright) and full **WCAG 2.1 AA** accessibility compliance across interactive financial workflows.
- Held production incident rate **below 8%** through Datadog, SumoLogic, and Bugsnag monitoring and disciplined on-call triage, while pair programming and providing detailed code review for newer engineers ramping onto loan-application surfaces.

Tonight · Software Engineer

Jul 2020 – Feb 2021 · San Francisco, CA

Mobile and web app surfacing local nightlife venues and events.

- Led the front-end development team of **3 engineers**, running daily stand-ups, establishing React conventions, and shaping UI/UX direction for the application.
- Developed front-end modules for web (React) and mobile (Swift, React Native), focused on low-friction discovery flows for nightlife venue and event surfacing.
- Designed and implemented RESTful Node.js and Express API endpoints backed by MongoDB, powering the data layer between the database and front-end modules.

SKILLS

FRONTEND

JavaScript (ES6+) · TypeScript · React · React Native · Expo · Next.js (App Router, Server Components, SSR, SSG, ISR) · Redux Toolkit · React Query · React Hook Form · HTML5 · CSS3 · Tailwind CSS · Styled Components · Framer Motion · Storybook · Design Systems · Component Libraries · Accessibility (WCAG 2.1 AA, ARIA) · Responsive Design · Performance Optimization · Core Web Vitals · Code Splitting · A/B Testing · Feature Flags

BACKEND & API

Node.js · Express.js · Ruby on Rails · Python · Django · REST APIs · OpenAPI · GraphQL · PostgreSQL · MongoDB · NoSQL · WebSockets · Webhooks

TESTING

Jest · React Testing Library · Playwright (E2E/Smoke) · RSpec · Test-Driven Development (TDD) · Unit / Integration / End-to-End Testing

TOOLS & PLATFORMS

AWS · Kubernetes · Docker · Vercel · GitHub Actions (CI/CD) · Git/GitHub · Webpack · Vite · npm · yarn · Mixpanel · Datadog · Sentry · SumoLogic · Bugsnag · Linear · Jira · Confluence · Figma · Slack · Agile · Scrum · Kanban · Claude Code · MCP

EDUCATION

App Academy · Immersive Full-Stack Software Engineering

San Francisco, CA · Oct 2019 – Mar 2020

University of California, Irvine · B.S. Biology

Irvine, CA · Sep 2013 – Jun 2017
